Changjiang Cai

Ph.D. Candidate – Department of Computer Science
Stevens Institute of Technology

+1 (201) 912-1947 • ccai1@stevens.edu
www.changjiangcai.com

Objective

To seek Ph.D. research internship roles, in the field of *computer vision*, *machine learning* and *deep learning*.

Education

- **Stevens Institute of Technology** **Hoboken, New Jersey, USA**
  Doctor of Philosophy in Computer Science, anticipated in 2020 *Jan. 2015 - Present*
  Research Interests: Computer Vision and Machine Learning. Specifically, stereo matching, semantic segmentation and human pose estimation.
  Advisor: Philippos Mordohai
- **Stevens Institute of Technology** **Hoboken, New Jersey, USA**
  Master of Engineering in Electrical Engineering
  Concentration: Computer Vision and Machine Learning. **Advisor**: Gang Hua
- **Xi'an Jiaotong University** **Xi'an, Shaanxi, China**
  Mechanical Engineering
  Research Area: Digital Image Processing. **Advisor**: Dehong Yu
- **Northwestern Polytechnical University** **Xi'an, Shaanxi, China**
  B.E. in Automobile Engineering
  Thesis: Structural Design and 3D Modeling of an Assistive Robot. **Advisor**: Renping Shao

Skills

- **Programming Languages:** Python, C/C++, Python& C++ Hybrid, Matlab
- **Library & APIs:** PyTorch, Tensorflow, Keras, Caffe, CUDA, Cython, OpenCV, Boost C++
- **Database:** MySQL, PostgreSQL
- **Tools:** Vim, Git, CMake, Bash, Tmux
- **OS Platforms:** Linux, macOS, Windows

Languages

- Chinese (native), English (proficient)

Research Projects

- **2019 Project (Ongoing):** *Cost-volume Filtering modules for Stereo Matching Networks*
  - Working on new modules which can be embedded into existing DNN approaches for improving their performances on stereo matching.
- **2019 Project -** *Depth-Aware Human Mesh Recovery, submitted to Conference*
  - Introduced a new method using RGB-D data to estimate a parametric human mesh model
- **2019 Project -** *Generalization and Robustness in Deep Learning Based Stereo Matching, submitted to Conference*
  - Proposed a novel family of architectures with improved generalization properties among different domains.
- **2018 Project - CBMV_ROB Entry in the Robust Vision Challenge:** *In conjunction with the workshop in CVPR'18*
  - Submitted the CBMV_ROB entry in the stereo challenge, leveraging CBMV volume as in our previous work and local expansion algorithm for optimization.
- **2017 Project - CBMV:** *A **C**oalesced **B**idirectional **M**atching **V**olume for Disparity Estimation*
  - Generated a matching volume by coalescing diverse evidence from a bidirectional matching process via random forest classifiers.
- **2016 Project - Crowdsourcing:** *Budget-conscious Ranking by Non-interactive Crowdsourcing*
  - Designed a crowdsourced ranking algorithm enabling task requester to obtain a good full ranking result from the crowdsourced pairwise comparison, with a limited budget.

Teaching Experience

- **CS442 - Database Management Systems** — **Stevens Institute of Technology**
  Teaching Assistant — *Aug 2016 – Dec 2016*

Intern Experience

- **Summer intern** — **UII Ameracia in Cambridge, MA**
  Research Intern — *May 2019 – Aug 2019*
